

Graduate Scheme – IT Solution Support & Project Management Graduate

UK

Vortex 6

Competitive

About the graduate scheme

Our people are our most valuable asset here at Vortex 6, and we strive to ensure that any new starter will get exposure across the business. This ensures that we have the talent to continue the growth in our company.

Our graduate scheme is no exception. This is an opportunity for 2 graduates to join our industry-leading team and gain experience in the following areas:

- Customer Consultancy and Support
- Customer Success
- Solution design and deployment
- Project management

After a period of 3 months, you will have the skills and knowledge to support our customers and ensure they are deriving value from our solutions. You will also be contributing to the design of the software and project managing new releases.

About Vortex 6

Located in Bracknell and working with some of the world's largest IT solution providers, including IBM, BT, Logicalis and many more. Our products enable these IT providers to operate more efficiently, ensuring they have the skills and capabilities to deliver solutions to their customers whilst optimising the profitability of their business.

The foundation to all of this? Our software application, V6fusion – used by over 100 partners worldwide. It has been meticulously designed to ensure certification compliance is maintained and incentive programs are optimised across IT manufacturer partner programs. The IT manufacturers we support are again big names, such as Cisco, HP and VMware.

The successful candidates will be on track to achieve a 1st class honours in a science based degree. Please note that software programming is not part of or a requirement of this role.

The role will suit graduates with good attention to detail, eagerness to learn, the ability to interpret complex information, good interpersonal skills and enjoy problem solving.
